Hi Selim,

I just finished my meetings are you available to talk tomorrow afternoon? The storm drain carrying City runoff needs to remain separate from your private drain, however, review of the proposed storm drain line and associated hydrology can be conducted by the City.

Hi Ron,

I have just left you a voice message.
I am meeting with the Trump Construction team tomorrow and need to give them an update on when we can start construction on the various improvements. The drainage is one of the items that we have to consider.
I am going to be in RPV tomorrow by 11:00 AM. Would it be possible to meet with you to discuss?

Thank you

Hi Ron, Hope that you are doing well,

Any decisions regarding the item we had discussed at out meeting of Tuesday October 23rd
Timing is crucial since the developer would like to start the Construction ASAP
Just a reminder of the items that we are awaiting a decision on:

1. Hydrology to be checked by the City
2. The use of the existing storm drain pipe running through the driving range to drain the 2 catch basins on PVDS
3. The storm drain plans to be checked by the City

Thank you
Selim Sawaya P.E. / P.L.S.

Subject: Tract 50666 # Street, Storm drain, Hydrology and WQMP

Hello Elias and Ron, hope that you both are doing well,

I would like to meet with you to discuss the above referenced items. It is important that we agree on what requirements/guidelines to use especially that we have a Vesting Tentative Map that was approved in 1997 and ammended in 2005.

I would like to discuss the WQMP and agree on a methadology in order to revise the report. Also, I would like to discuss the Hydrology and the storm drain system especially that a significant portionof it has been constructed.

I also would like to discuss the design of the Palos Verdes Drive South hoping to get some feed back regarding the horizontal alignment.

I am available anytime next week. Late mornings work better for me.

Please let me know when you are available.

Thank you
